

## Cool Websites and Applications

- **Workfrom:** Find a private or public place to work, meet, or have lunch or drinks in major cities around the world.
- **Slack:** Bypass cumbersome email with messages and documents that users can share team wide across platforms. Includes social media integration.
- **Trello:** Project management based on a system of cards and project boards.
- **Dropbox:** Access and share folders. Great for exchanging large files, collaborative work, and backups.
- **Evernote:** A robust and hugely popular notebook and productivity program that functions as a paperless office. Integrates well with productivity systems based on Getting Things Done.
- **Meldium:** Password management for teams. A central website lets members give others access to the information they need without sharing passwords.
- **Hackpad:** Collaborative documents that allow people to work together in real time.
- **Draft:** Collaborative writing tool allowing teams to write, edit, and explore documents together.
- **Sunrise:** Calendar and planner that integrates to popular apps like Facebook, Evernote, and Trello.
- **Skitch:** Evernote app that lets you annotate documents and images by adding arrows, text, and other information to screenshots and images.
- **iDoneThis:** Prompts each member of your team via email to record the day's activities, and then compiles responses into a digest and distributes it team wide.
- **Asana:** Fosters collaboration and productivity with tools for organizing tasks, assigning responsibilities, and maintaining goals.
- **GoToMeeting:** Simple connectivity for video conferencing.
- **iMeet:** Combines video and audio calls with document sharing.
- **yaM:** Stands for "yet another meeting." Streamlines planning, scheduling, and note taking for virtual and face-to-face meetings.
- **Box:** Enterprise-friendly file sharing and collaboration.
- **Momentum:** A personal dashboard that displays everything you need to get motivated, stay on track, and accomplish your goals.
- **Yugma:** Web conferencing with shared desktops and files.
- **Pocket:** Helps keep you focused by allowing you to save articles to read offline when you have some downtime.
- **Focus@Will:** Streams background working music to foster concentration and attention span, using principles of neuroscience.
- **Boomerang:** Scheduled email sending and reminder service.
- **Hootsuite:** Popular social media management dashboard.

- [1Password](#): Team-oriented password management and security.
- [Docady](#): Converts your camera-equipped smartphone into a scanner.
